

L O U D
OF SWEDEN

Simply Sound

Loud of Sweden develops **wireless** audio systems that pair **professional quality** with **easy installation**, enabling complete **freedom** in public spaces for a **simplified sound experience**.

Loud of Sweden is founded by experts in the audio for public spaces industry.

Company experience extends from technical knowledge and electronic product development to years of sales and installation services.

Our deep understanding of the market led us to develop this B2C audio system to better fit the unique needs of installation specialists in retail and hospitality environments.

Our Products

S1 Satellite Speaker

TW1 Subwoofer

B1 Base Unit

Loud of Sweden products include the rich sounding high quality wireless **S1 Satellite Speaker**, the powerful **TW1 Subwoofer** that adds incredible depth and our intuitive proprietary **B1 Base Unit** that serves as control center for your sound system.

With our unique Local Gateway frequency for transmitting wireless sound, and massive reach of up to 1000m, this system is free of interruptions.

The Loud of Sweden system is mounted and powered using standard lighting tracks, offering

the flexibility of wireless sound with quick and easy installation. Designed by installation specialists, it is easily convertible and extendable to cover additional space.

Music has the power to transform a space, and should stand out more than the system behind it. Our products, designed in Sweden, blend into any existing public or retail environment.
